

Short User Instruction Blushield Portable:

- Charging: use the USB cable to charge the portable with you laptop, desktop, etc.
You can also use a USB charger that is suitable for the socket-type in your country, to charge the portable through a wall socket.
- Check the battery status by pressing briefly on the button:
4 lights at the right of the device means that the battery is fully charged.
One light means that the battery needs to be recharged.
- To turn the portable on, press the button for 2 seconds. You see the lights at the right ascending. When the portable is turned on, the light in the left upper corner will flash about 2 times per minute. The frequencies are broadcasted at that moment.
- To turn off the portable, press the button for 2 seconds. You will see a descending of the lights at the right.
